

TESLA, INC.

EQUITY VALUATION SUMMARY

Independent Financial Modeling Project
FY2021A–FY2025A Historical | FY2026E–FY2030E Forecast
VALUATION DATE 3 SEPTEMBER 2026 | NASDAQ: TSLA | USD MILLIONS EXCEPT PER-SHARE DATA

The model values Tesla's explicitly forecast Automotive, Energy and Services cash flows at **\$32.57** per share against a market price of **\$376.37**. The gap is the finding, not an error: at the current price the market capitalises operating performance and optionality — autonomy, AI software and robotics — that this model does not forecast as separate cash-flow streams.

VALUATION RANGE · IMPLIED SHARE PRICE

REVERSE DCF · WHAT THE MARKET PRICE REQUIRES

MARKET-IMPLIED ENTERPRISE VALUE	\$1,451,707M
FUNDAMENTAL DCF ENTERPRISE VALUE	\$93,694M
6.5% of the bar above	
15.5×	MARKET-IMPLIED EV ÷ FUNDAMENTAL DCF EV
	Justifying the market price on the modelled economics requires FY2030E free cash flow of \$169,982M — 15.7× the Base Case \$10,815M.
At the current price the market appears to capitalise operating performance and/or optionality materially beyond the Automotive, Energy and Services cash flows this model forecasts explicitly.
